

Aluminum honeycomb core panels

ALUCELL is the new brand by Isoleader, an Italian company based in Roverbella (Mantova), producing honeycomb panels.

ALUCELL is available in 3 series named ALUCELL ALU, ALUCELL HPL and ALUCELL STEEL all covered by low flame spread certificate.

ALUCELL ALU

ALUCELL ALU are made of honeycomb aluminum core finished with aluminum sheets that can be anodized or painted. This type of panel is used as a support of interior wall linings, ceilings etc.

ALUCELL HPL

ALUCELL HPL are made of honeycomb aluminum core and covered by an HPL foil on one side and an aluminum sheet on the opposite side. This type of panel combines the resistance and lightness of aluminum with the decorative finishing. Alucell HPL is used as a wall coating or part of furniture.

ALUCELL STEEL

ALUCELL STEEL are made of honeycomb aluminum core covered by galvanized steel sheets. Alucell Steel is particularly suitable for all those applications where good mechanical strength is required (coating and floors).

ALUCELL panels are MED certified as "C class divisions".
