

Helmsman Chairs & Deck-Rails

The complete line of well known and popular helmsman chairs & deck-rails.

NorSap AS was established in 1969 as a company working with aluminium products. Today the major products of this company, which is located in Kristiansand (Norway), are helmsman and operator chairs which are mounted onboard supply vessels, passenger ferries, cruise ships, offshore rigs, navy vessels, yachts, fishing vessels and even submarines.

NorSap is flexible to adapt quickly to specific demands. NorSap makes use of 3D modeling software, in-house engineers and designers who focus on effective, flexible solutions. Many of these are customized based at special inquiries. NorSap has machines for rapid prototyping to make sure such solutions can be seen in short time.

NorSap also manufactures products for the pleasure boat market, table and seat columns and other equipment.

Whatever the end market is, NorSap aims to provide rugged but stylish products, specifically designed to suit the customers' need.
